Anodised aluminium

4 mm clear acrylic

Fixing kit included

Clear Hygiene Barrier

Keep your distance with your clients. Clear Hygiene Barriers made of acrylic and aluminium will help to keep a distance and protect from any particles in the air. They can be placed next to each other to cover wider desks or cashiers. The height of the clear panel can be adjusted easily by sliding in the vertical profiles.

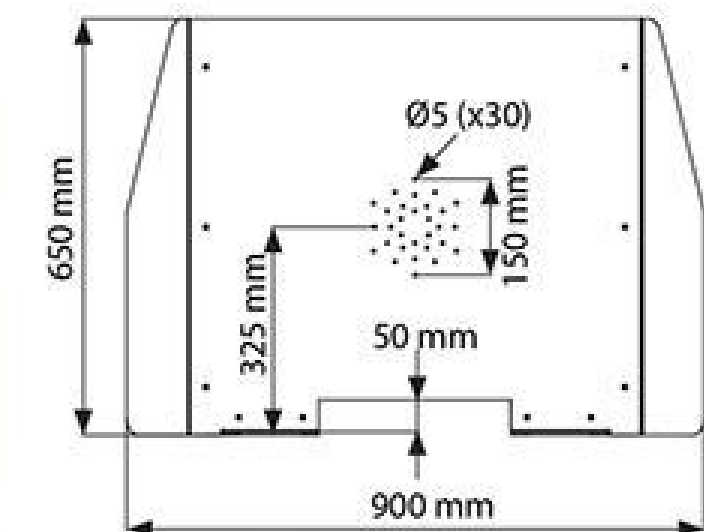

Modular system can be configured to suit any size space.

CODE	SIZE
UB1008	1000x800mm
UB1010	1000x1000mm
UB1012	1000x1200mm
UB1208	1200x800mm
UB1210	1200x1000mm
UB1212	1200x1200mm

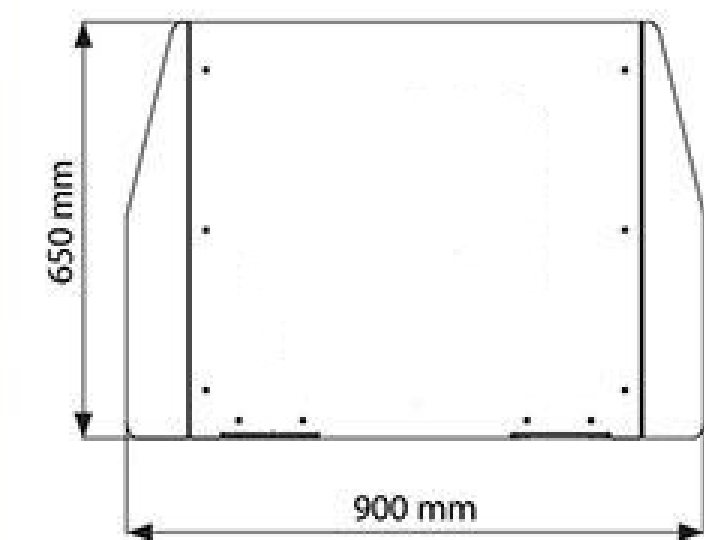

Clear Hygiene Separator

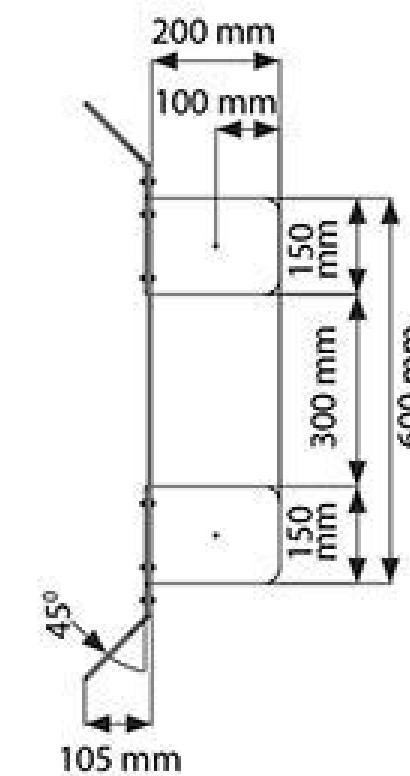

Transparent panel to create protection against coughs and sneezes. Simple and universally usable design suits a variety of environments, such as pharmacies, health surgeries, receptions, and many more. The foot offers a secure stand on the counter, table, or reception desk. It has optional document slot and optional speaking holes. Supplied flat-pack for easy transportation.

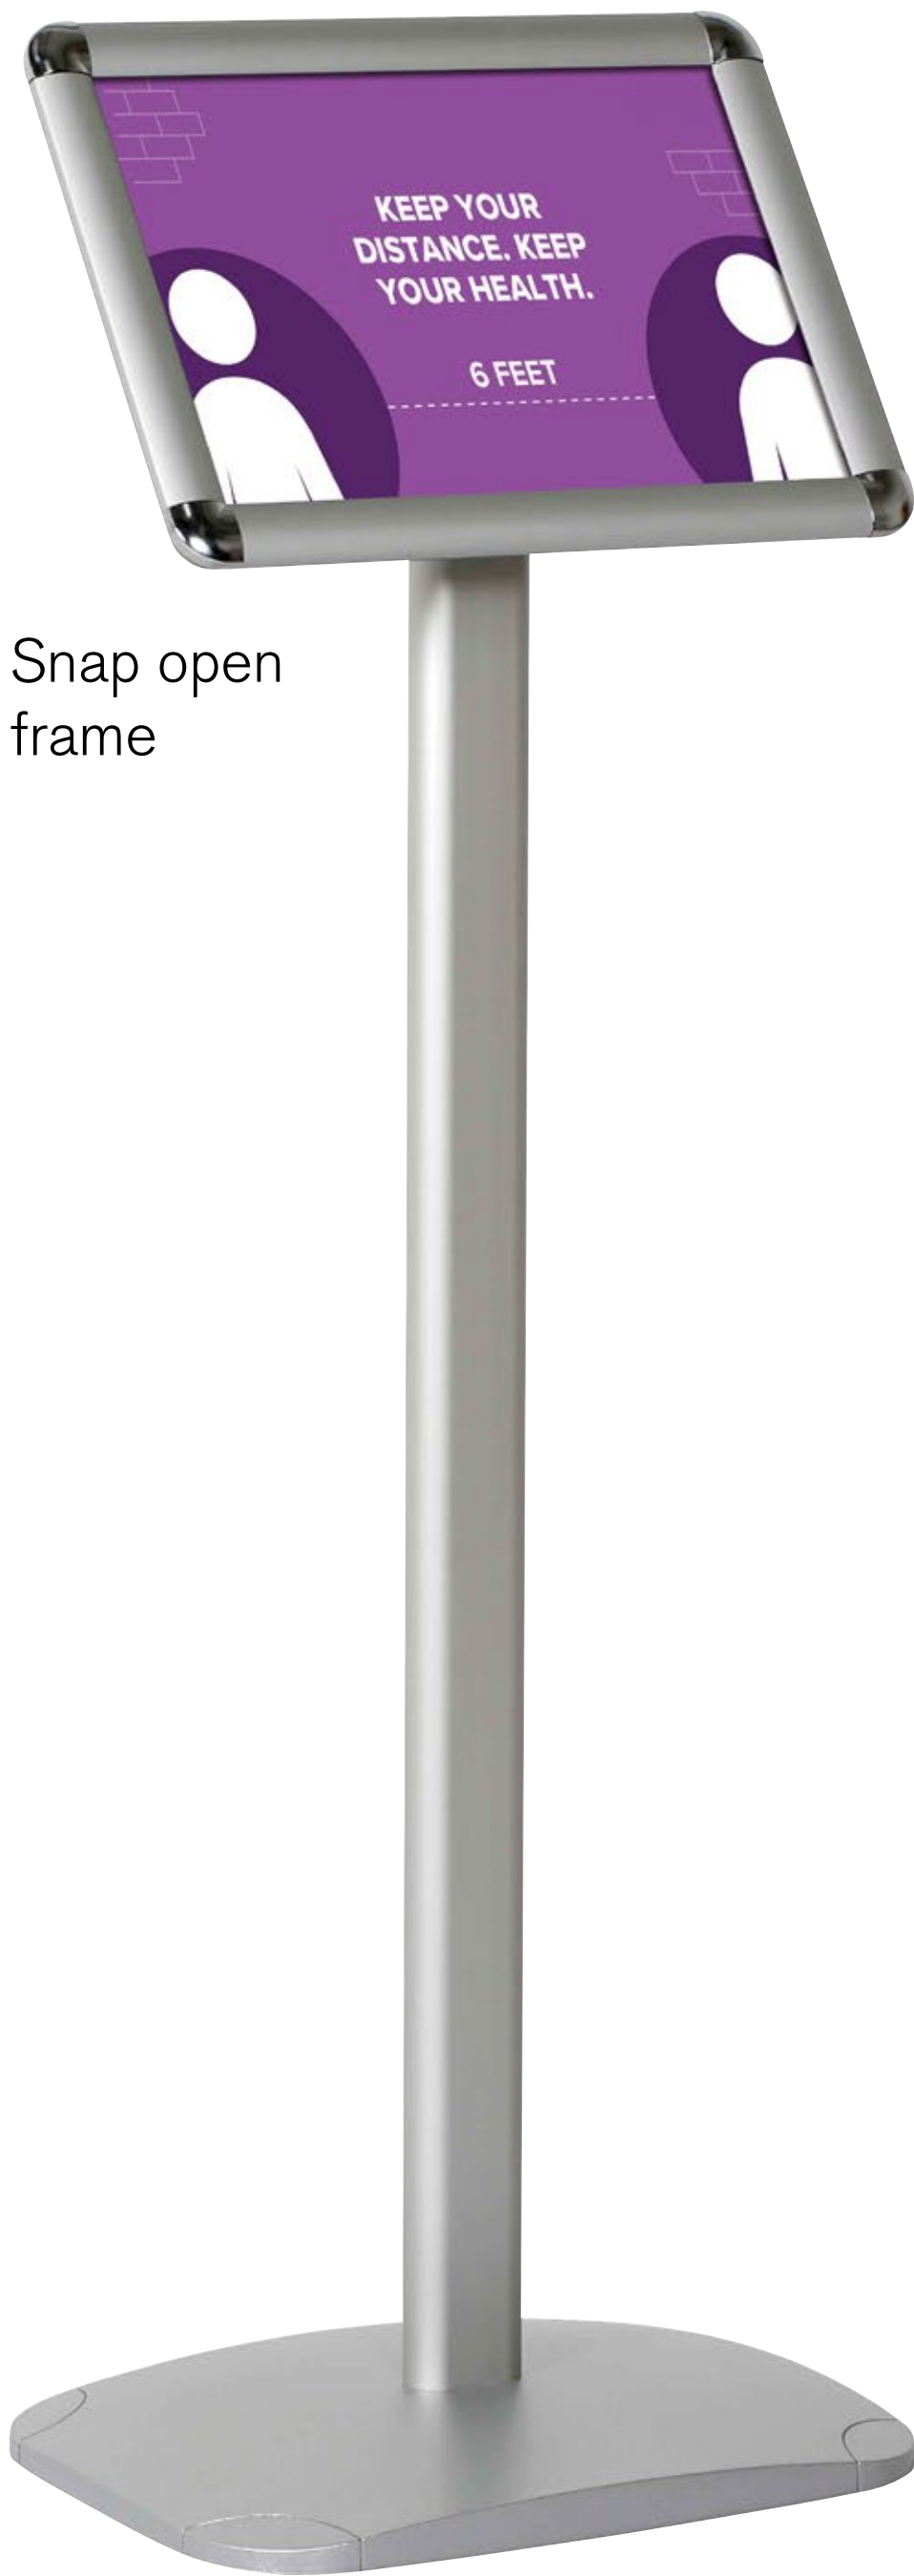

With delivery slot and speaking holes

Without slot or holes

Snap open frame

Locks in portrait or landscape

Aluminium profiles

Hygiene Notice Board

Inform people to keep their distance. Suitable for any public area. Use messages such as; “No more than 2 people at a time”.

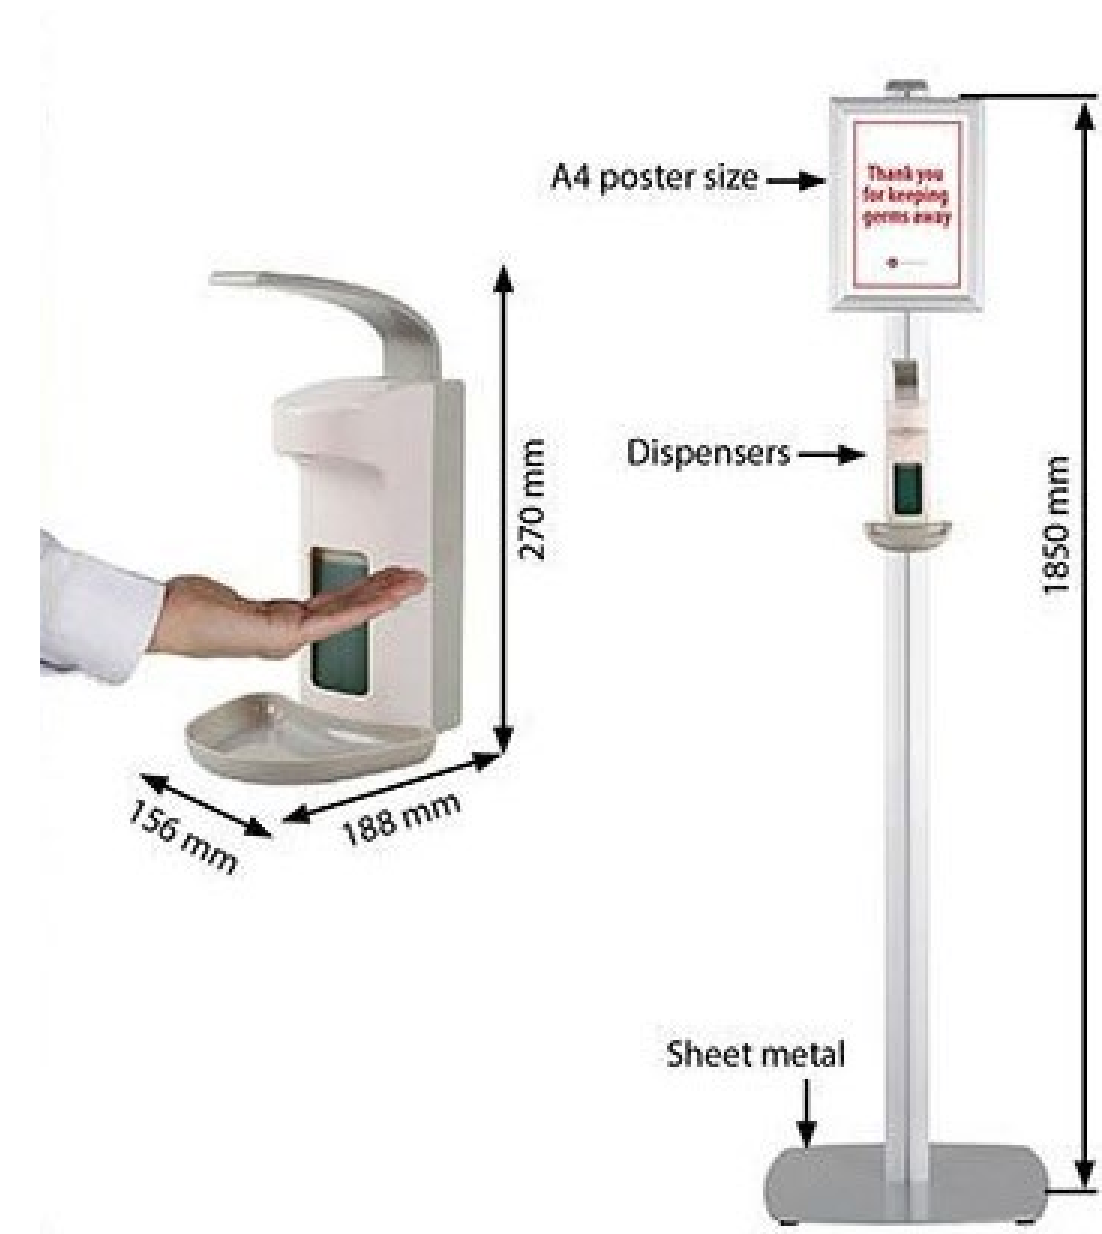

The Hygiene Notice Board will pass the necessary health messages to the public easily.

			1150mm	A3 landscape / Black

Sanitising Station

Floor standing Sanitising Station is an essential item to minimise the spread of any virus or bacteria. It is constructed in aluminium complete with a heavy steel base. Comes with a snap frame for messages to the public as well as sanitising dispenser. Designed for 1000ml and 500ml gel sanitiser and foam soap (not included).

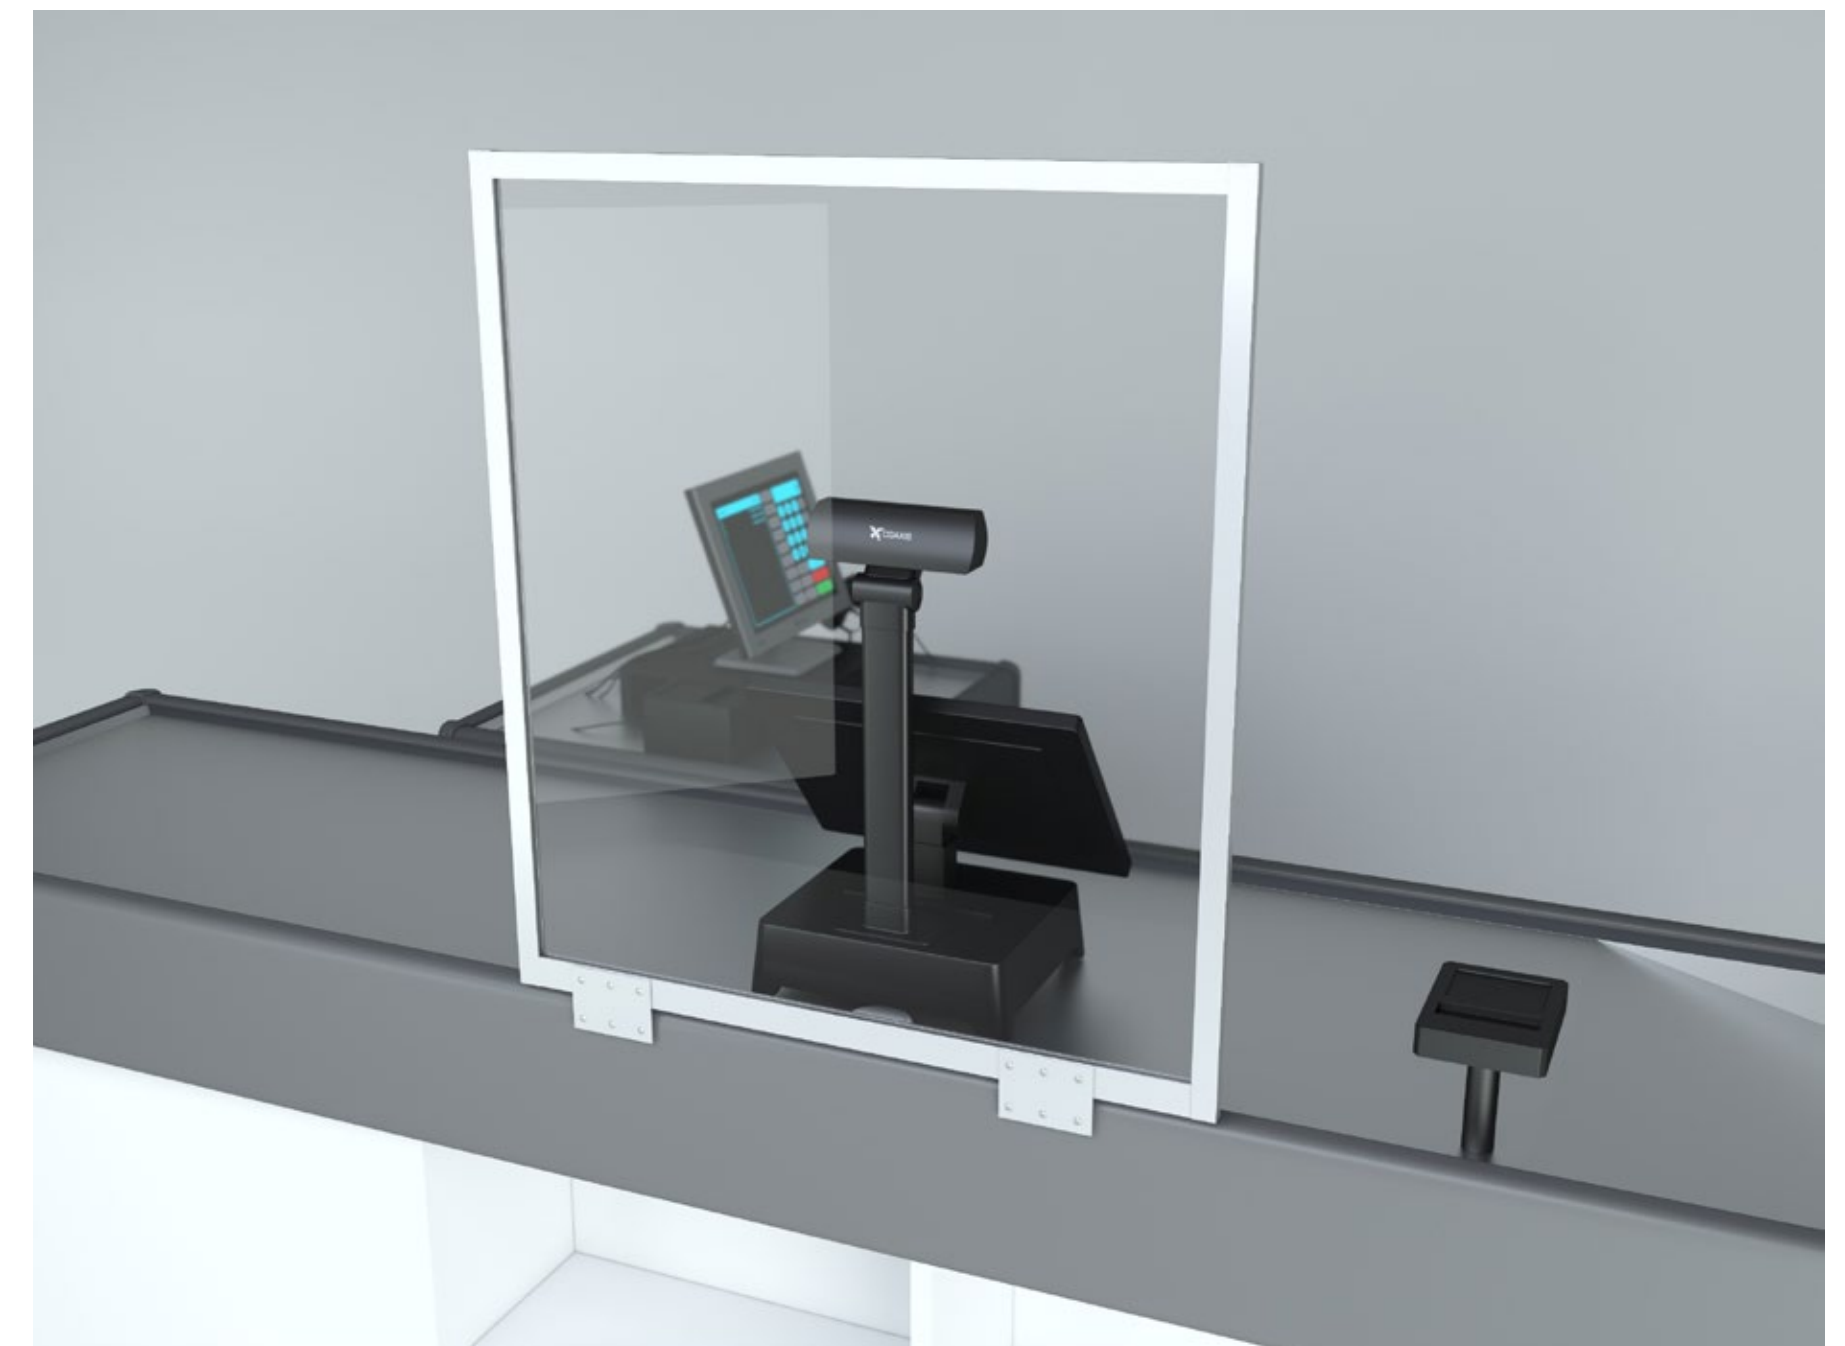

Hygiene Notice Screen

Mobile Cough and Sneeze Screens

- Creates a protection barrier against direct coughs and sneezes.
- These kits can be couriered to location and assembled in minutes.
- They can be easily moved into position to give the most protection.
- They can be easily cleaned and disinfected regularly.
- The transparent screen allows full communication.

Fixed Cough and Sneeze Screens

Open-space divider screens

- Creates a physical division to help when groups of people share an indoor space.
- Direct the flow of footfall and create barriers that help protect areas without visually blocking any space.
- They are assembled easily on site.
- They can be moved and re-used where needed.
- They are modular; create as large a division as needed.
- They can be easily cleaned and disinfected.

Queue Management

- People respond more to queueing when a physical system is in place.
- Direct the queue to the most appropriate space.
- Keep access ways open.
- Create alternative queues to give priority access to the most vulnerable and to NHS staff.
